## **BOOK SYNOPSIS**

Taking a psychoanalytic and developmental approach, *Autistic Child as a Person* outlines in considerable detail the new developments in therapeutic techniques used by the Tavistock Autism Team and Workshop to treat autistic children. It also underlines the importance of support for parents and siblings, who are all too often ignored, as a factor in the child's progress. The book presents fresh ideas about the importance of personality for the developmental course of the condition, and the implications of psychotherapeutic technique. Using case vignettes to illustrate the theoretical ideas emerging from the Workshop, coupled with case studies which highlight the patient's changing contact with the therapist, it gives a fascinating picture of the individuality of each child and of the sensitivity and skill required for each treatment. Aiming to be accessible to both professionals and parents, the text should provide a useful insight into the nature and course of this condition and its treatment.
